Table of Contents

1. User Manual Overview

This user manual provides instructions to our users on how to operate both the Venato app and GPS device. This manual details the steps required for a new user to make an account and sign up for our app, in addition to explaining how to do so. This is done with the aid of illustrations in order to make the Venato user experience as smooth and easy as possible.

This user manual also describes how you can set up your GPS device and ensure that it is connected with the Venato app and is fully functional. We have also provided a guide for you on how to navigate the Venato app. This will allow users to take full advantage of the multiple features that our app offers, whilst simultaneously eliminating any potential confusion or problems.
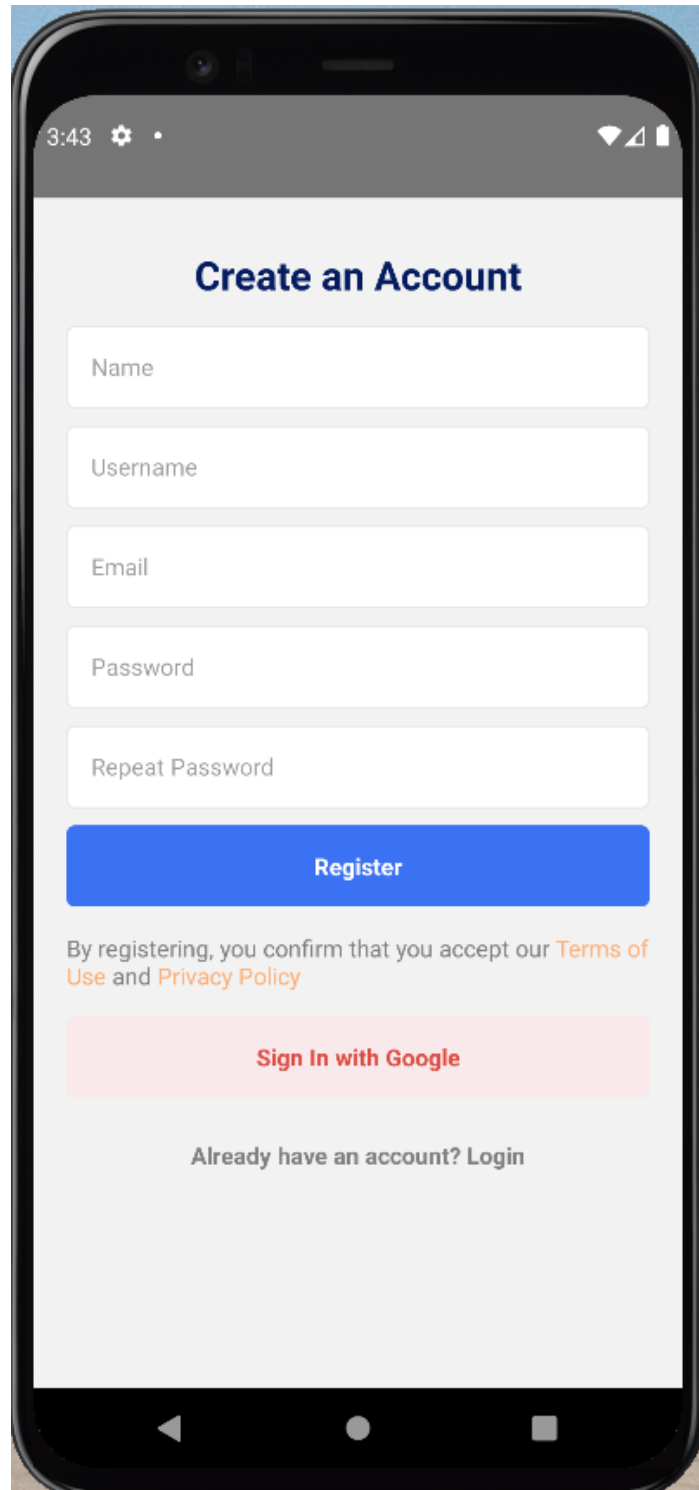

2. Venato Sign Up

2.1 User Sign Up

When you open the Venato app as a user, you are presented with the screen below. Since you do not yet have an account, you can sign up for one by clicking the create account option at the bottom of the screen.
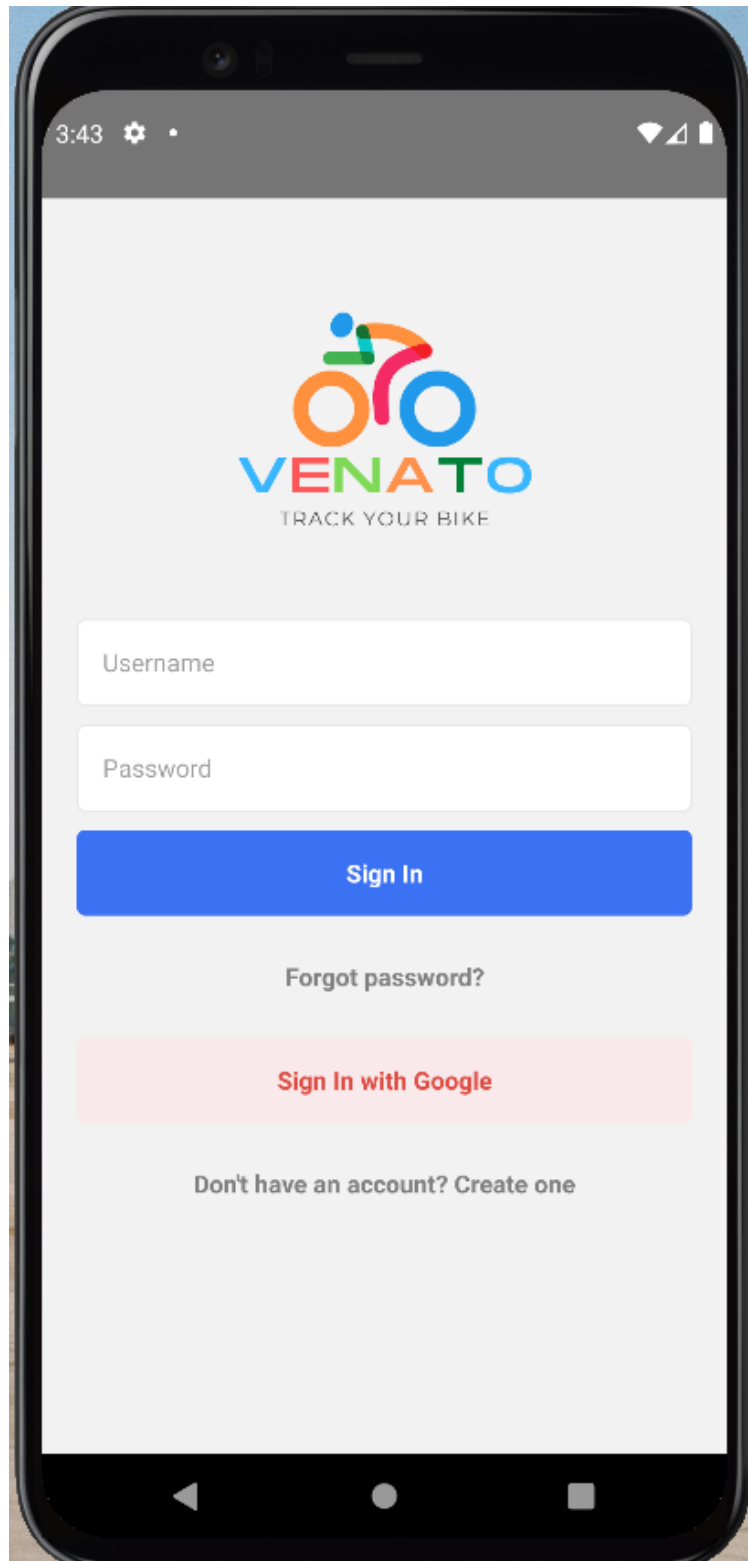

2.2 Fill Out User Details

After selecting the create account option, you are brought to the screen below. You are now required to provide your name and an email address for verification. You must also choose a unique username and password. Once you have filled out your details, press the 'Register' button.

2.3 Verify Email Address

Now that you have set up your account, you must first verify it before you are able to sign in. In order to do this, go to the email address that you provided and find the verification code that we sent to you. You will now be on the screen pictured below. Enter the verification code into the text field and then press the 'Confirm' button.
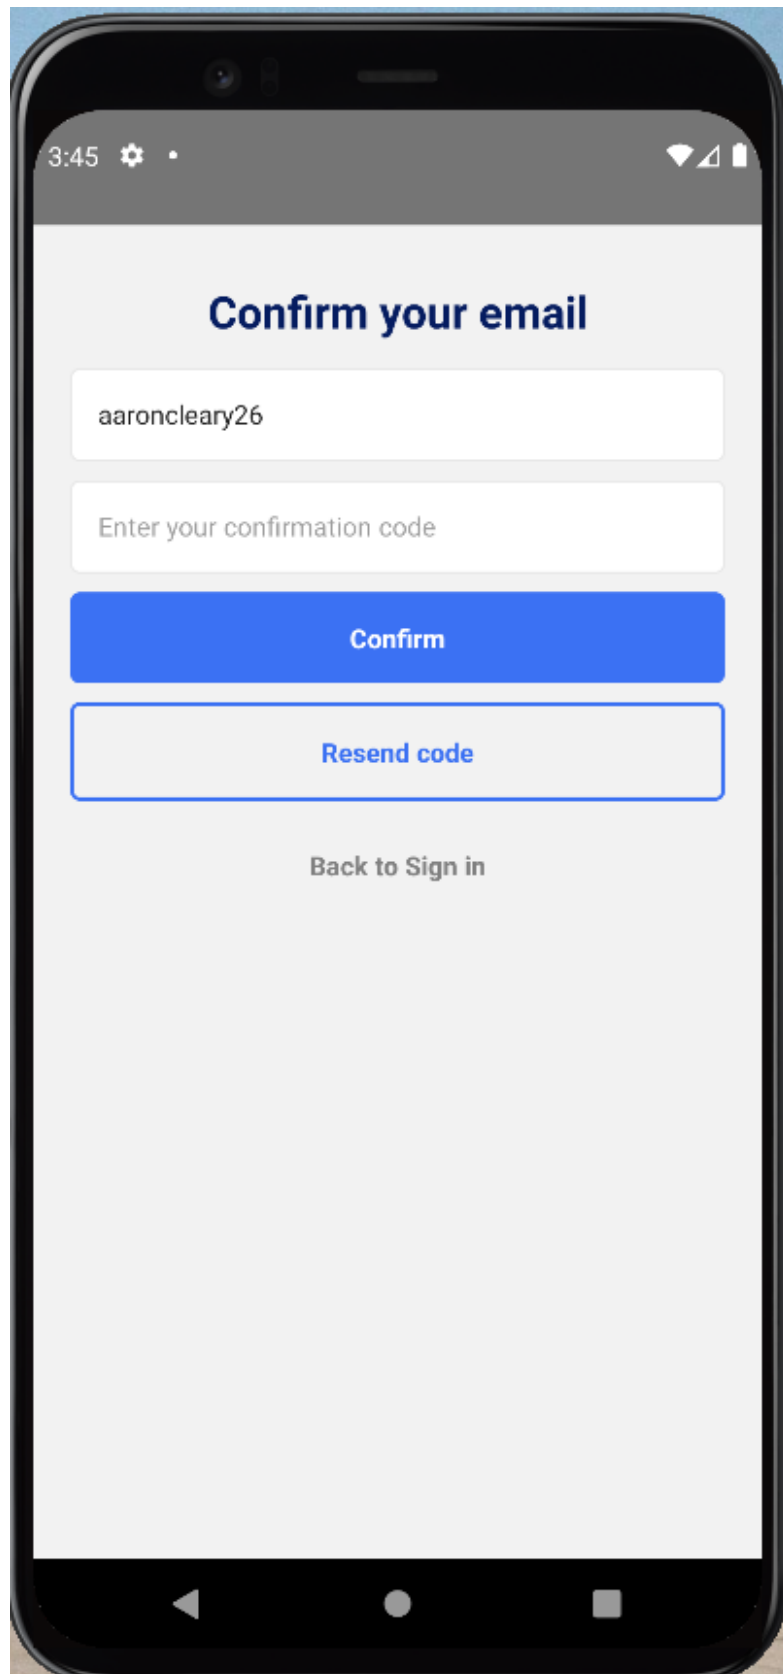

2.4 Sign In

You have now successfully verified your Venato account. You can now sign in to our app using the username and password that you created in step 2.2. To do this, simply fill in the username and password text fields and press the 'Sign In' button.
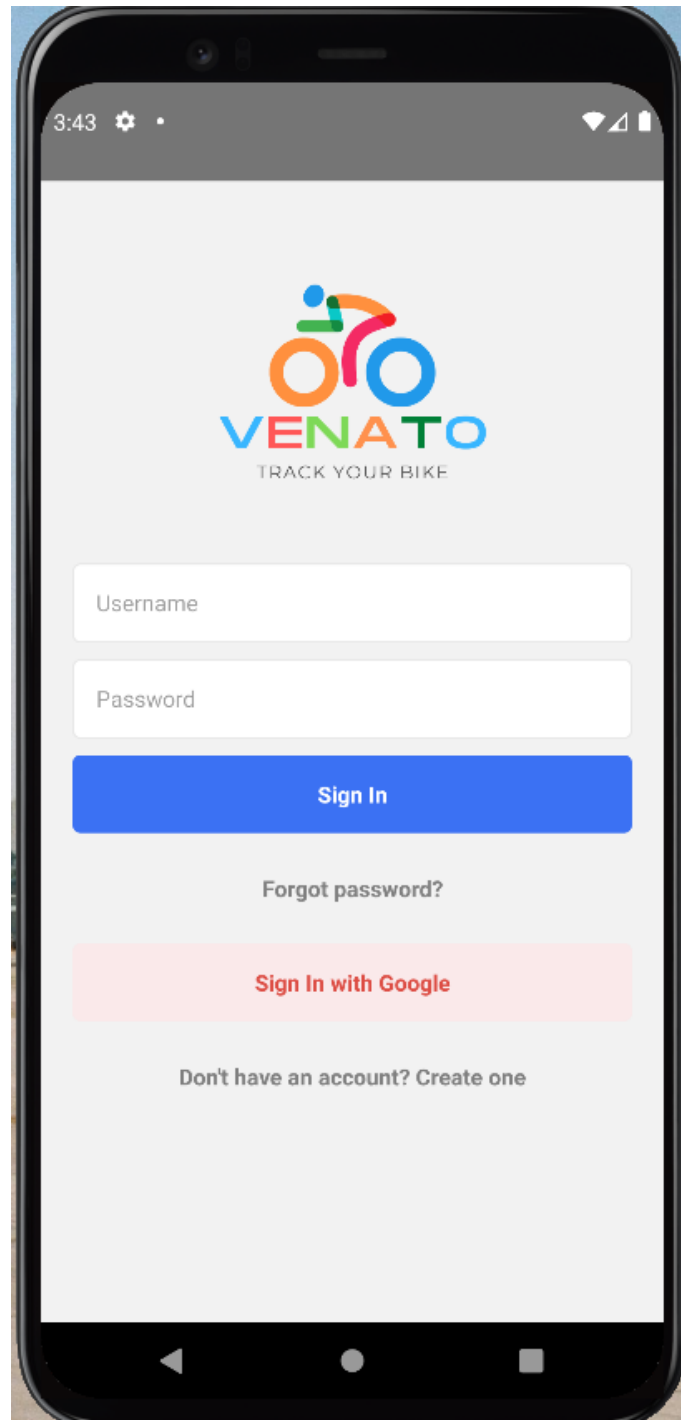

You have now successfully signed up for the Venato app. The next section of this user manual will show you how to set up your GPS device and track your bike on our app.

3. GPS Device Configuration

In order to track your bike on the Venato app, you must first configure your GPS device. We have already set up the GPS device so that it is ready to use. When you turn on the device by pressing the power button, it will automatically connect to our app and display the location of the device. You can now choose how to mount the GPS device onto your bike, but please ensure that the device is secure and will not fall off when you are cycling.

4. Venato App Guide

4.1 Home Screen

When you sign in to the Venato app, you will come to the home screen pictured below. At the bottom of your screen, you can see that there are 3 tabs to choose from. The home screen that you are currently on is the first of these tabs.
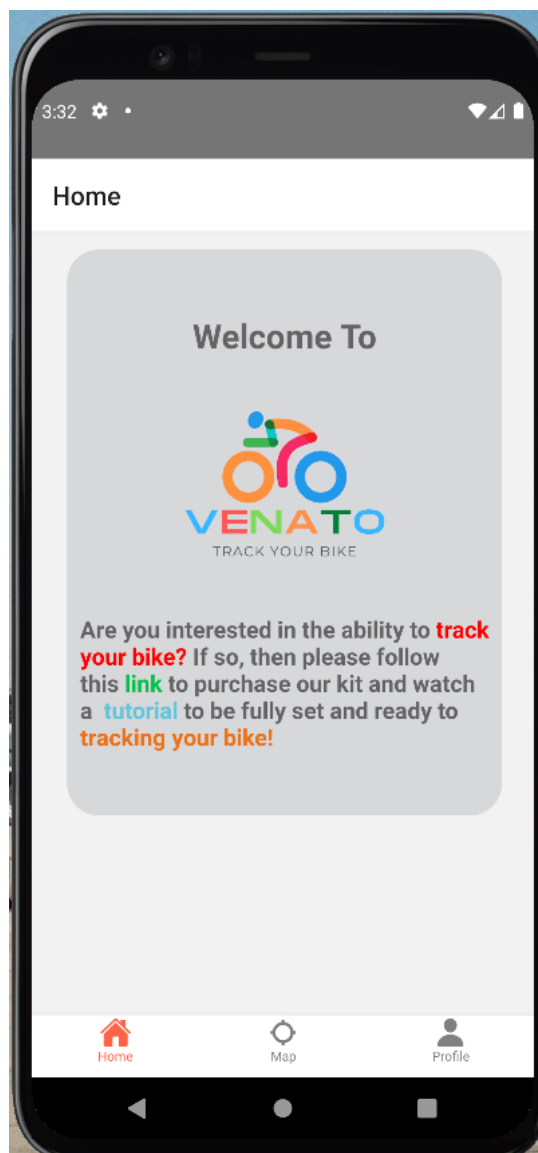

4.2 Map Screen

The second tab brings you to the map, as pictured below. Immediately you can see the location of your bike, which is represented by the pin on the map. The map has a zoom feature, meaning you can zoom in and out on the map by intuitively pinching the screen. If you were to go for a cycle, the app would continually update the accurate location of your bike in real time.
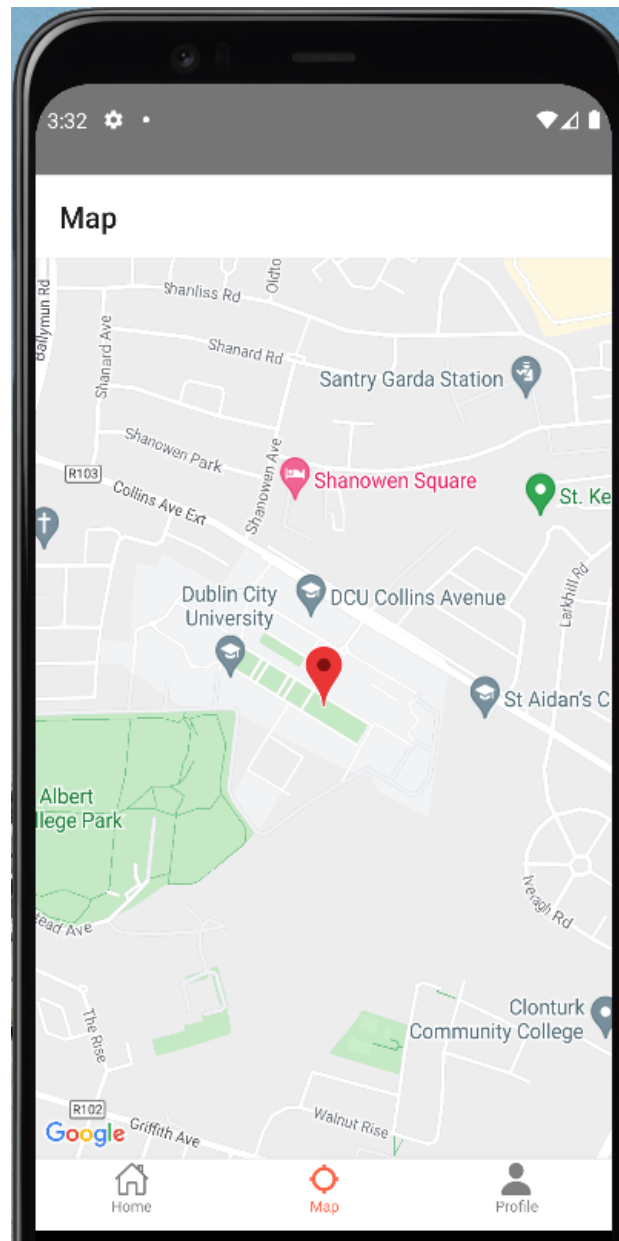

4.3 User Profile Screen

The third tab brings you to your user profile, as pictured below. As you can see, the user profile screen displays your personal information, including your name, Instagram handle, phone number, email address and location.
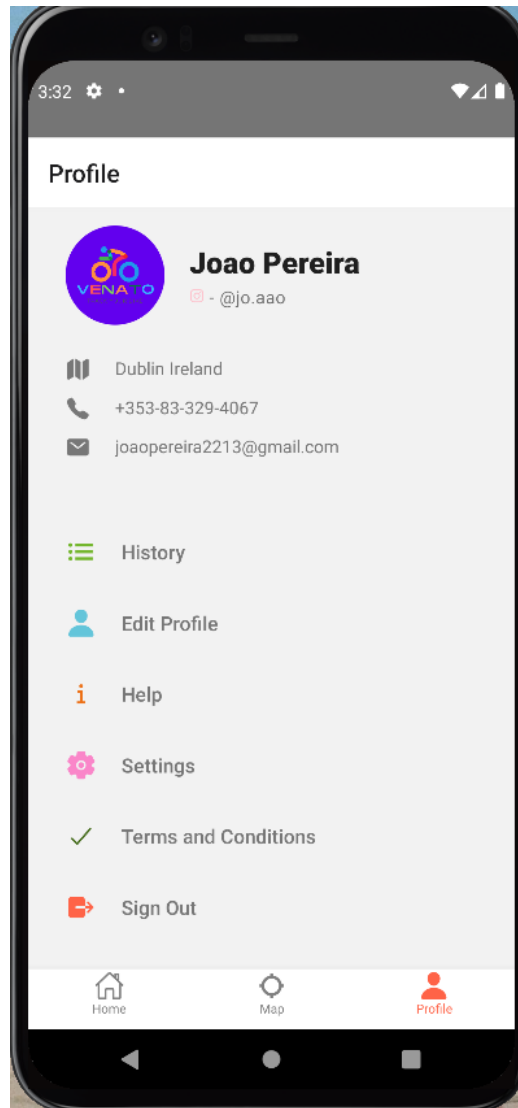

There are also interactive features on this screen, which are history, edit profile, help, settings, terms and conditions and the sign out option. The history option shows the recent location history of your bike. The edit profile button allows you to change your provided user information. When you press the help option, you will be brought to this user manual, which you can consult in order to answer any questions. The settings feature enables you to switch between the default display colour scheme and a 'dark mode'. The terms and conditions option allows you to view Venato's terms and conditions. Finally, when you press the sign out option, you will be signed out of your account and brought back to the app starting screen, as seen in section 2.1 of this user manual.
